綠惜地球促把握修例機會

修補建築物能源效益條例大漏洞

本會發現香港十大商場節能表現尚可，惟全港 156 幢商業樓宇用電量增。現時法例容許大樓用電量有增無減，以致能源審核形同虛設。政府宜修例要求這些樓宇的業主解釋，並提交節能計劃。

The Green Earth urges the government to address the loopholes in the Building Energy Efficiency Ordinance during its amendment process

While The Green Earth found that Hong Kong's 10 largest malls achieved satisfactory results in energy saving, 156 commercial buildings have increased their energy consumption. The current law does not set limits on energy use, rendering energy audits futile. The authorities should revise the law to require building owners to justify their energy usage and submit plans to improve energy efficiency.

第一階段即棄塑膠管制適應期完結

綠惜地球倡加推重用走即棄減廢

當局稱商戶大致合規，逐漸適應環保新法例。本會建議當局推廣餐具租借和自攜餐具，如商戶適應情況佳，應及早推行第二階段管制，踢走即棄塑膠。

Adaptation period for phase 1 of disposable plastic regulation ends.

The Green Earth advocates for reusable alternatives to reduce waste

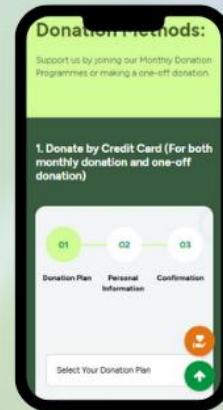

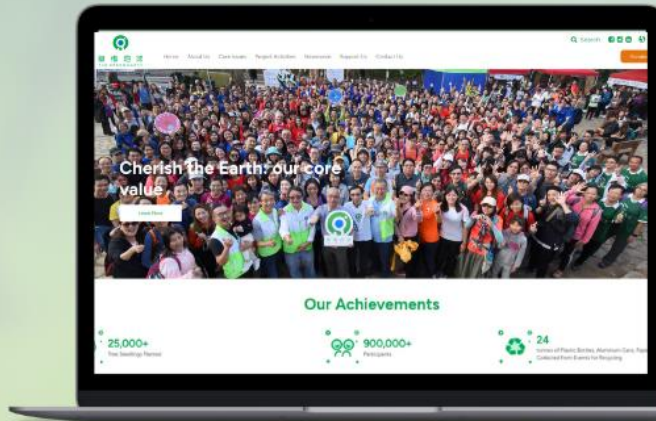

The authorities stated that most eateries have complied with and adapted to the new green law. We urge the government to promote tableware rental services and encourage customers to bring their own reusable tableware. Additionally, the next phase of the single-use plastic ban should be implemented promptly as restaurants become ready.
