## EXECUTIVE DIRECTOR'S MESSAGE

親愛的合作夥伴、朋友及「綠惜地球」的支持者：

綠惜地球創辦人及總幹事劉祉鋒（左），副總幹事黃子勁（右）。

Edwin Lau, Founder and Executive Director of TGE (left). Rico Wong, Deputy Director of TGE (right).

經過 36 載環保耕耘，也許是時候回應我健康的需求，我即將卸下綠惜地球總幹事一職。綠惜地球自 2016 年初創立以來，經歷了無數重要的里程碑，從涓涓細流發展為具影響力的環保組織，尤其在政策倡議及可持續發展教育方面，深受社會的信任與肯定。

今天，我欣然宣布現任副總幹事黃子勁將於 2025 年 9 月 1 日起接任總幹事一職。黃子勁在環境教育及非牟利機構管理方面具備豐富經驗，加上領導團隊的鼎力支持，定能確保順利交接，並堅守我們的核心價值。我深信，綠惜地球在他的帶領下，將繼續穩步向前，開創新猷，邁向更高的里程碑。

作為創辦人，我將繼續在環境教育方面儘力提供支援，同時懇請各位長期合作夥伴及支持者，一如既往地支持綠惜地球團隊。您的鼓勵對我們的工作及為環境帶來深遠正面影響至關重要。

在此，我再次衷心感謝各位一直以來無論順境或困境中的支持。讓我們攜手努力，推動環境改善，共創綠色及可持續的未來。

劉祉鋒, MH  
創辦人及總幹事

Dear valued partners, friends, supporters of The Green Earth,

Having worked for the environment for more than 36 years, and faced with some health issues, I have decided that it is time for me to step down as Executive Director of The Green Earth (TGE). The Green Earth, which I founded in early 2016, has achieved significant milestones, from humble beginnings to becoming a trusted and influential voice in the environmental space through our policy advocacy and sustainability education efforts.

I am pleased to let you know that our Deputy Director, **Rico Wong**, will assume the role of **Executive Director** effective 1 September 2025. Rico's expertise, leadership and proven experience in environmental education and NGO management, alongside the strong support of our leadership team, will ensure a seamless transition and a steadfast commitment to our core values. I am confident that TGE will continue to thrive and reach new heights in the years to come.

As Founder, I will continue to provide my support in environmental education, and I humbly ask you, our long-term partners and supporters, to extend the same unwavering support to the TGE team that you have so generously shown me over the years. Your ongoing dedication is crucial to advancing our mission and making a meaningful, lasting impact on the environment.

Once again, I would like to express my heartfelt gratitude to every one of you for your gracious support, even during the most challenging times. Together, we have accomplished so much, and I believe that, with your continued commitment, we can drive further positive change and build a greener, more sustainable future.

Warm regards,

Edwin Lau, MH  
Founder and Executive Director

氧化可降解塑膠禁制一年仍有售 環保署承諾加強解說

## Banned oxo-degradable plastics still on sale despite year-long ban EPD vows to enhance public awareness

氧化可降解塑膠遇氧會分解成微塑膠，嚴重影響生態。

When exposed to oxygen, oxo-degradable plastics break down into microplastics, causing serious impact on our ecosystem.

本會在 3 月到市面巡查發現，逾 70 商戶及網購平台疑售賣含違規成分的塑膠，如垃圾袋、寵物糞便袋、食物袋等。調查獲 9 間媒體報道後，商戶旋即將問題產品下架，環保署隨即更新“截塑”網站介紹，亦通知逾千間寵物用品店留意產品成分。

In March, we identified over 70 vendors and e-commerce platforms suspected of selling plastic products containing non-compliant additives, such as garbage bags, pet waste bags, and food bags. After 9 media outlets reported on the issue, merchants promptly withdrew the non-compliant products. The Environmental Protection Department updated the "Plastic Interception" website immediately and notified over 1,000 pet supply stores to review their product components.

### 漁船光污染管制有進展 漁護署撥款助漁戶轉用合規光燈

#### Progress in controlling light pollution from fishing vessels

**AFCD has allocated funds to help fishermen switch to compliant fishing lights**

有飽受漁船強光滋擾的苦主稱，新漁燈光綫減少“至少一半”。

A victim who was troubled by strong lights from fishing boats said that the new fishing lights reduced brightness by "at least half".

本會去年調查揭發不少海上漁船使用違規光燈捕魚，並要求漁農自然護理署跟進。署方今年兌現承諾，以「漁業持續發展基金」資助及推廣改裝的捕魚光燈。本會到現場視察，發現漁燈在加裝燈罩後，成功減少燈光反射，避免造成大範圍光污染。

Last year, our investigation revealed that many fishing boats at sea used illegal fishing lights. We reported this situation to the Agriculture, Fisheries and Conservation Department and requested follow-up actions. This year, the department delivered on its promise and used the "Sustainable Fisheries Development Fund" to subsidize the adoption and promotion of modified fishing lights. Our field inspection found that the lampshade installation successfully reduced light reflection and avoided large-scale light pollution.
