

曾與綠惜地球到啟德視察 中學生設計光污染劇本殺獲獎
Secondary school students who previously visited Kai Tak with The Green Earth win awards for a light pollution-themed role-play game

三名拔萃女書院同學有感本港光污染嚴重，設計沉浸式遊戲。

Three students from Diocesan Girls' School have designed an immersive game that combines live-action role-play and onsite puzzle-solving to raise public awareness of light pollution in Hong Kong.

三名拔萃女書院同學有感本港光污染嚴重，設計了一個結合「劇本殺」及實地解謎的沉浸式遊戲，藉此呼籲大眾關注光污染。該計劃獲得小童群益會「感創敢為3.0 — 青年社會創新服務獎」金獎。今年八月，綠惜地球曾帶領學生到光污染重災區啟德視察，發現該區大型廣告顯示屏以及裝飾燈的光度過強，令人不適。學生們遂決定以啟德作為體驗場景，設計遊戲讓參加者化身光污染調查員，

協助大學科研搜集數據，為日後向政府部門提出改善建議提供支持。是次活動特別感謝「香港大學戶外燈光公民科學平台」的潘振聲博士、蘇柱榮博士及其團隊提供協助。

綠惜地球長期關注光污染議題，以往曾聯同大學及環境顧問公司測量香港市區光害，並於「世界生態城市高峰會」發表報告，指出本港光污染重災區的光害程度超出國際標準達九倍。

Three students from Diocesan Girls' School won the Gold Award in the Boys' & Girls' Clubs Association of Hong Kong's (BCGA) "Youth ImpACT Award 3.0" for designing an immersive game that combines live-action role-play and onsite puzzle-solving to raise public awareness of light pollution in Hong Kong.

In August, the students and The Green Earth (TGE) visited Kai Tak, one of Hong Kong's light pollution hotspots, for a site inspection. They observed that intense brightness of large video walls and decorative lighting installations caused significant discomfort to residents and visitors alike. Inspired by these findings, the students decided to set their game in Kai Tak, enabling participants to act as light pollution investigators, collect real-life data for university research, and provide a basis for future policy recommendations to government departments. TGE extends special thanks to Dr Jason Pun, Dr So Chu-wing and the members of the HKU External Lighting Citizen Science Project team for their support.

As a longstanding advocate for addressing light pollution, TGE has collaborated with universities and environmental consultancy firms to measure light pollution levels in Hong Kong's urban areas. These findings, presented at the 'Ecocity World Summit', revealed that light pollution levels in the most affected areas exceeded international standards by as much as nine times.

2024 年廢紙及廢膠樽數量上升 綠惜地球呼籲政府建立生產者責任制
Paper and plastic waste rise in 2024: TGE calls for producer responsibility system

政府於上周（12月22日）公布最新廢物統計數據，人均廢物棄置量下降至每日1.4公斤。由於廚餘及金屬的回收量大為增加，整體回收率上升至34%。然而，紙張及膠樽的棄置量卻錄得升幅，加上塑膠回收量及回收率下跌，令整體回收增幅受限。

垃圾徵費的準備工作曾引起社會對減廢的廣泛關注，而政府逐步淘汰即棄塑膠亦初見成效。然而，垃圾徵費最終未能如期推行，當局須思考如何推動社會減廢。綠惜地球呼籲政府建立一套行之有效的生產者責任制度，有助重新增加公眾對減廢的積極性和信心。

<https://shorturl.at/8U1rA>

The government released the latest waste statistics last week, showing that per-capita waste disposal has fallen to 1.4 kilograms per day. The overall recycling rate increased to 34%, primarily driven by significant rises in the recycling of food waste and metals. However, the disposal of paper and plastic bottles increased, while declines in plastic recycling volume and rate limited the overall progress in recycling.

Preparations for the implementation of waste charging had previously drawn widespread public attention to waste reduction, and the government's gradual phasing out of single-use plastics has shown initial success. However, with waste charging ultimately stalled, the authorities must now explore ways to sustain momentum in waste reduction. A robust and effective producer responsibility scheme could play a key role in reigniting public motivation

play a key role in reigniting public motivation and confidence in waste reduction initiatives.

More about TGE's suggestions:

<https://shorturl.at/8U1rA>

垃圾收費延遲實施 綠惜地球建議政府處所帶頭先行
Waste charging has been postponed once again. TGE is urging the government to implement it on its own premises first

政府在今年九月再度宣佈延遲實施垃圾徵費，綠惜地球憂慮此舉可能令香港無法達成《香港資源循環藍圖 2035》「人均棄置量逐步減少 40% 至 45%」的目標，並影響香港邁向碳中和的步伐。

綠惜地球認為，政府應盡快重新制訂減廢策略和加強回收配套，以重建市民對政府執行垃圾收費決心和信心，從而樂意參與垃圾徵費，共同為香港實現減廢與減碳目標。本會建議政府率先在其轄下場所推行垃圾徵費，避免依賴成本高昂的焚化爐作為主要的廢物處理方式，並參考內地一線城市的減廢政策。

有關綠惜地球的建議，請瀏覽：<https://shorturl.at/ZRRir>

In September, the government once again announced a delay in implementing municipal solid waste (MSW) charges. TGE is concerned that this decision may hinder Hong Kong's progress towards carbon neutrality and make it difficult to meet the Waste Blueprint for Hong Kong 2035

target of reducing per capita waste disposal by 40 - 45%.

TGE believes that the government should urgently revise its waste reduction strategy and strengthen recycling infrastructure to restore public confidence in its commitment to implementing MSW charges. This would encourage public support for waste charging, contributing to both waste reduction and carbon emission mitigation in Hong Kong. We recommend that waste charging be introduced first in government premises to lead by example, avoid over-reliance on costly incinerators as the primary waste management solution, and draw lessons from effective waste reduction policies implemented in first-tier cities in the Chinese mainland.

施政報告出爐 綠惜地球籲加強生態旅遊及盛事的環保政策 TGE urges stronger policies on ecotourism and mega-events following the Policy Address

行政長官於今年九月發表《2025 年施政報告》，綠惜地球建議當局在未來採取更積極的保育政策，包括在發展生態旅遊的同時，投放更多資源及人手進行保育及教育工作，並慎重評估環境承載力。

另外，綠惜地球建議當局加強盛事旅遊的環保政策，包括要求活動主辦方達到特定環保指標，例如

以重用餐具取代即棄餐具。

有關綠惜地球的建議，請瀏覽：<https://shorturl.at/yL0H3>

In September, the Chief Executive delivered his 2025 Policy Address. In response, TGE called for more proactive conservation policies. Regarding ecotourism specifically, we emphasised that the government should allocate greater resources and manpower to conservation and public education, while carefully assessing and monitoring the environmental carrying capacity of ecotourism sites.

TGE also recommends that the government strengthen environmental policies for mega-events, including requiring organizers to meet specific environmental targets, such as replacing disposable tableware with reusable alternatives.

讓大自然給予我們力量 | 綠惜樹林認養計劃

**Reconnect with nature and experience its restorative power — The Green Earth
Charity Woodland**

「綠惜樹林」是一片栽種希望的地方。綠惜地球的植樹場已種植超過萬棵樹苗，每棵樹苗盛載著植樹者和捐贈者的願望和愛心，在我們悉心照料下茁壯成長。計劃除了惠及大自然中的野生動物，保育和恢復生物多樣性，更讓人與大自然連結。

有什麼野生動物於綠惜樹林裡生活？[立即收看](#)

綠惜樹林認養計劃

TGE's Charity Woodland represents hope in action. The site is now home to over ten thousand trees, planted by volunteers and supporters who share our vision for a greener Hong Kong. We continue to care for these trees as they grow and create vital habitat for native species. Our goal is twofold: to support local biodiversity and to create a space where people can reconnect with nature and experience its restorative power.

Following the publication of last year's children's picture book "[What Happened to our Mountain Friends?](#)", TGE is pleased to launch [the 'Leave No Trace' Teacher's Handbook](#) this year. This handbook provides practical advice for incorporating Leave No Trace principles into outdoor activities, along with detailed lesson plans and teaching materials. To further support teachers, we are hosting workshops to share the benefits of Leave No Trace education and help students cultivate a deep appreciation for nature.

The handbook has been distributed to schools across Hong Kong and is available for educators to download free of charge.

Additionally, TGE offers a range of 'Leave No Trace' education programmes, including outreach workshops, booth games, and guided outdoor experiences. For enquiries or to book a session, please email or call us for details.

香港山徑日 2025 「同理山林」圓滿結束 Hong Kong Trails Day 2025: 'Empathy with Nature' Proves Successful

「同理山林」是今年的主題，綠惜地球透過一連串公眾教育活動，建立愛惜大自然的同理心，活動反應熱烈。香港山徑日 (10 月 26 日) 當天，參加者聆聽山徑故事後，更與我們合力編織用於維修山徑沖蝕的石籃，為「[自己山徑自己修](#)」義工隊製作山徑維修的工具，以雙手回饋自然。

義工隊亦於 11 月下旬，修復了港島徑一段約 200 米距離的山徑，包括修建石級、排水道及保護山徑邊坡的石牆等。搬運碩大的石材到山上並不容易，但維修後的山徑與自然融合，讓義工的努力變得值得。適逢港島徑啟用 40 周年，希望大家繼續支持我們可持續山徑的教育工作，讓山徑「長走長有」！

This Year's Theme – "Empathy with Nature"

Through a series of public education activities, TGE has fostered empathy for nature, and the response has been remarkably positive. On Hong Kong Trails Day (26 October), participants listened to stories about the history of our trails and joined us in weaving "Rock Baskets" (rock-filled wire structures) that will be used by our [Trail Repairing Volunteer Squad](#) in future restoration projects. These hands-on activities allowed participants to contribute directly to trail conservation and give back to nature.

In late November, our Volunteer Squad successfully restored a 200-metre section of the Hong Kong Island Trail. The restoration work included building stone steps, installing drainage channels, and constructing retaining walls to protect the trail's edges. Transporting heavy stones up the hillside was no easy task, but the finished trail blended beautifully with the surrounding nature, making all the effort worthwhile.

As we celebrate the 40th anniversary of the Hong Kong Island Trail, we hope everyone will continue supporting our sustainable trail education efforts, ensuring that our trails can be enjoyed for generations to come!

為多項盛事提供綠惜支援
Providing green event support for various events

本季綠惜支援共接觸 超過49,000名參加者及義工

回收量

1,700個鋁罐

19,800個膠樽

義工Y：

第一次見到咁多回收物，好震撼！
好開心可以令佢哋唔洗去堆填區！

綠惜地球在過去3個月為不同類型的活動提供綠惜支援，接觸超過49,000名參加者及義工，共回收19,800個膠樽，1,700個鋁罐，1,240公斤廢紙，1,081公斤廚餘及1,739公斤玻璃。

有綠惜大使表示：「第一次見到咁多回收物，好震撼！好開心可以令佢哋唔洗去堆填區！」感謝各機構、參加者和義工的支持，你們的認同，是我們繼續推動綠惜盛事動力。

綠惜地球支援活動包括：

Dark 45

Pink Walk乳健同行 2025

香港迪士尼樂園 10K Weekend

苗圃行動挑戰 12 小時慈善越野馬拉松

嘉里香港街馬 2025

青協背包跑 2025

(按活動舉行時間順序排列)

Over the past three months, we have provided green event support for a variety of activities, engaging more than 49,000 participants and volunteers. Together, we collected 19,800 plastic bottles, 1,700 aluminum cans, 1,240 kilograms of waste paper, 1081 kilograms of food waste and 1,739 kilograms of glass, all recycled from landfill.

One of our Green Ambassadors captures the impact perfectly: “It’s the first time I’ve seen so many recyclables—it’s truly overwhelming! I’m so glad they didn’t end up in the landfill!” We extend our heartfelt thanks to the participating organisations, participants, and volunteers. Your support and recognition fuel our drive to continue promoting green events.

Green Events Supported (Listed in chronological order):

Dark 45

Pink Walk 2025

Hong Kong Disneyland 10K Weekend

Sowers Action Challenging 12 Hours Charity Trail Marathon 2025

Kerry Hong Kong Streetathon 2025

HKFYG Run For Wellness 2025

社區及學校環保教育

Empowering Schools and Communities to Live Green

草本染印環保袋工作坊

Herbal Dyeing and Eco-Bag Printing Workshop.

綠惜地球於屯門圖書館，多間中小學及專上學院舉辦一系列環保活動，包括《星際聯盟回收大作戰：100+ 日常廢物處理攻略》、舊橫額升級工作坊、咖啡畫工作坊、攤位遊戲，淨灘行動、我的綠惜生活和氣候變化講座等。透過互動學習與創意體驗，提高學生和社區的環保意識，共同實踐綠色生活，攜手守護地球。

導師與學生在灘岸上發現微塑膠

Our instructor and students discovered many microplastics.

TGE has delivered a wide range of environmental education activities at Tuen Mun Library and across primary, secondary, and tertiary education institutions. Activities included interactive and experiential learning sessions such as “*Interstellar Recycling Mission: 100+ Everyday Waste Solutions*”, upcycling workshops (transforming old banners and creating coffee paintings), booth games, beach clean-ups, and talks on topics such as “My Green Living” and climate change. Through these creative, hands-on experiences, students and community members gain practical skills for sustainable living and deepen their environmental commitment.

Walk The Talk – Green Trails Challenge | Clean-up Trails and Connect with Nature

WALK THE TALK - GREEN TRAILS CHALLENGE

惜山競走

Jan – Feb 2026

ENGAGE as much as 100 of your **employees** all together...

RECONNECT with nature, take them out on a **hiking experience** that allows them to **grow and bond as a team**

Where they can learn about **PROTECTION** of local biodiversity and leave no trace

And **VOLUNTEER** their efforts in contributing to our **waste survey and research!**

綠惜地球
THE GREEN EARTH

綠惜地球的年度籌款活動 — 「惜山競走」將於 2026 年 1 月正式展開。

活動期間，我們將帶領企業參加者在香港十條不同的山徑上進行淨山活動。參加者不僅能了解香港的生物多樣性及實踐無痕山林的七大原則，更會進行廢物審計，一起記錄及分析山徑的垃圾種類及數量。收集到的數據將有助我們更深入了解和保護香港珍貴的自然環境。

頒獎典禮將於 2026 年 3 月舉行，表揚各企業對保護山林的貢獻及展示計劃成果。

讓我們以行動守護大自然，一起為香港的美麗郊野出一分力！

TGE's annual fundraising event – **Walk The Talk: Green Trails Challenge** will officially launch in **January 2026**.

During the event, we will lead corporate participants on clean-up activities across ten selected hiking trails in Hong Kong. Along the way, they will learn about Hong Kong's biodiversity, practice the seven principles of **Leave No Trace**, and conduct **waste audits** to record and analyse the types and quantities of litter found. The collected data will help us better understand and protect Hong Kong's precious natural environment.

An award ceremony will be held in March 2026 to recognise the contributions of participating corporations and showcase the results of the initiative.

Join us to walk the talk—take action today to protect nature together and preserve the beauty of Hong Kong's countryside!
